

Cloud Computing: Unit 2 Storage and Distributed Systems

VTU 2022 Scheme CBCS - BCS601 Module 2

--- MODULE OVERVIEW & LEARNING OBJECTIVES ---

1. Cloud Storage Architecture: Block Storage vs Object Storage vs File Storage
2. Amazon Simple Storage Service [S3]: Buckets, Keys, and Lifecycle Policies
3. Google File System [GFS]: Master node architecture, Chunkservers, and Replication
4. Hadoop Distributed File System [HDFS]: NameNode, DataNode, and Heartbeat mechanism
5. Consistency Models in Distributed Cloud Storage: Strong vs Eventual Consistency

--- IMPORTANT VTU 10-MARK QUESTIONS ---

- Q1. Explain HDFS architecture and data read/write workflow in detail [10 Marks]
- Q2. Compare GFS and HDFS architecture with schematic diagram [10 Marks]
